

Web Presence Project

**Crafting & Compelling Website Analysis, Audit
and Recommendations**

SRISANDHIYA NARAYANAN | MBTE1 (BADM-WD-T-B3)

Company Selection

- I selected the company “[HCL Technologies](#)” for this Web Presence Project.

About HCL Technologies:

- HCL Technologies offers a wide range of services, including IT and business consulting, software development and digital transformation solutions.
- They focus on areas like AI & Generative AI, cloud computing and software services helping businesses enhance efficiency and drive innovation.
- Their industry-specific solutions span sectors like healthcare, financial services, Technology and manufacturing, enabling clients to enhance efficiency and drive innovation.

Product and Service Descriptions

AI & Generative AI:

- HCL Technologies empowers enterprises to effectively navigate their AI/GenAI journey, from ideation and engineering to large-scale deployments and achieving business impact.
- 67% of experience leaders wield GenAI to unlock real-time insights.

Cloud Services:

- HCL Tech's distinctive CloudSMART strategy offers enterprises a comprehensive and high-value platform for cloud consulting and delivery.
- Managed cloud services ensures enterprises for a world of multi-cloud and server-less environments.

Product and Service Descriptions (Cont)

Software solutions:

- It drives the Digital+ Economy by developing, sharing, and supporting solutions across five key areas:
 - Business and Industry Application - Deliver memorable CX that drive conversions & revenue
 - AI and Intelligent Operations – From human led to AI led operations
 - Total Experience – Coordinating delightful experiences on a trusted platform
 - Data and Analytics – Enable confident data driven organizations
 - Cyber security - Secure DevOps and compliance from applications to endpoint

Website Platform Identification:

- **Platform:** The website is developed on Drupal, identified using Wappalyzer.

hcltech.com

Technology stack

CMS

Drupal

Responsive Design Testing

Tools Used: GTmetrix and BrowserStack.

Report:

- **Home Page:** It is mobile-friendly but has enormous network payloads.
- **About Us Page:** Need to be optimized for mobile as scrolling is difficult.
- **Services Page:** It has mobile responsiveness but needs optimization since navigating complex service pages on smaller screens can become difficult due to extended scrolls and dense menus.
- **Industries Page:** As there is a vast range of industries, the hierarchical structure is dense, making it difficult for users to quickly find specific information.
- **Contact Page:** Well optimized for mobile and user friendly.

Website Mistakes Identification

Suggestions to HCL Technologies Website:

- Grouping under multiple submenus could be streamlined for easier access.
- A compact presentation would improve readability as descriptions are quite lengthy and detailed with repetitive content, overwhelming readers looking for concise information.
- Inconsistent branding across different sections particularly between HCL Tech and HCL Software might confuse users due to different visual themes and navigation flows.
- The site is content-heavy especially those with large images and videos, may experience slower load times. Optimizing could help improve performance.
- The footer contains an overwhelming number of links and categories, which could confuse users or cause decision fatigue.

Website Best Practices List

- Optimizing multimedia content or utilizing techniques like lazy loading could help improve performance.
- Ensure branding remains consistent across the entire website.
- Create intuitive, easy-to-use menus for clear and simple navigation across pages.
- Prioritize mobile design to ensure a seamless user experience across all device sizes.
- Using engaging visuals and multimedia content can improve time spent on the page and reduce bounce rates.
- Regular maintenance keeps the website functioning efficiently and aligned with the latest industry standards.

Landing Page Design

Objective: To generate leads for CloudSMART Solutions.

Landing page design: Designed using WIX - [click here to view](#)

Design Features:

- An introductory section with a clear and persuasive core offering.
- Service section on brief description of each service offered.
- Features session describing how the service would have a positive impact in their business.
- Benefits session in which a trust is built to purchase the service.
- Strong and visible call-to-action to drive conversions by requesting for a demo session.
- About session on basic overview of the company.

Conclusion

- This project successfully highlighted the fundamental aspects of digital marketing and website design, prioritizing the creation of an engaging and intuitive digital experience for HCL Technologies.
- I designed a landing page that effectively highlights HCL Tech's CloudSMART solutions, with the goal of driving lead generation and boosting brand awareness.
- The practical insights and design suggestions provided will aid in the ongoing enhancement and improvement of HCL Tech's online presence.

Thank You!
